SOMEBODY IS SURE TO BE

SERIOUSLY HURT

in the general decline in prices which is beginning to be felt. The merchant who has bought quantities at top prices must either sell to you away above the declining market or take some big losses. It isn't human nature to take any loss that can be avoided.

We never had our stock in any better shape than it is to-day and we are in a position to take advantage of breaks as they come. This means that we are going to be able to get our legitimate profits and sell on the new levels.

Keep this in mind. It will be worth good money to you before Spring.
